1. Approach

GreenME seeks to expand nature-based therapy and green care practices to enhance adult mental health and wellbeing equity, alongside socio-ecological benefits. Over four years, it plans to diagnose, increase scientific evidence, and empower green care actors to integrate nature-based therapy within a broader green care framework. Green care, as defined by GreenME, encompasses everyday interaction with nature, health promotion activities, and therapy for individual patients.

The project will employ a transdisciplinary and mixed-methods approach to understand the distribution of mental health benefits from green care and co-create solutions to promote equitable access. This includes developing EU-wide and country-specific guidelines, training programs for therapy providers, and replicable partnership models for cross-sectorial green care systems.

The goal is to foster just, climate-resilient, and sustainable healthy communities by increasing the adoption of nature-based therapy and reframing the functionality of green infrastructure.

GreenME's guiding pillars:

- Learning from existing green care interventions
- Co-designing research and co-creating geographically scalable policy guidelines.
- Integrating mental health and wellbeing impact assessment with a focus on health equity and environmental justice.

Our project understands green care as a three-scale continuum:

- **Nature in everyday life:** promoting the integration of nature into daily routines.
- **Nature-based health promotion:** advocating for nature-centric approaches to enhance overall health.
- **Nature-based health therapy:** exploring and fostering forest therapy, blue therapy, and horticulture therapy as viable mental healthcare interventions.

Target audience

GreenME identified 7 different target groups:

- TG1: Local/regional/national administrations
- TG2: Healthcare system administrators and providers (including healthcare professionals and nature-based therapy providers)
- TG3: Landowners and land trusts
- TG4: CSOs, NGOs, citizens associations
- TG5: EU policy and decision-making bodies
- TG6: Higher education organisations, Research centres and institutes

- TG7: Projects, clusters, and R&I initiatives

Which can be divided into:

- Primary target: TG2, TG4
- Secondary target: TG1, TG3, TG5, TG6, TG7

Target group code: Actors	Specific key target groups identified by GreenME
TG1: Local/regional/national administrations	Bolton city council (UK), Ruhr Regional Association (DE), Catalan Sustainable Development Council (ES), Barcelona region Council (ES), Catalan Government department on climate action food and rural areas (ES))
TG2: Healthcare system administrators and providers (including healthcare professionals and nature-based therapy providers)	Dortmund Health Department (DE), State Center for Health in the North Rhine- Westphalia (DE), Powys Teaching Health Board Grow Cardiff (UK), Kent and Medway NHS and Social Care Partnership Trust (UK), Catalan Health Department (ES), DKV Insurances (ES), ML Källarbacken AB- Coaching Forest bath (SE), Kluvhult farm (SE), Humla maden Green rehabilitation (SE), Trojkanatur rehabilitation (SE)
TG3: Landowners and land trusts	UNESCO trusts biosphere reserve Rhön (DE), Catalan Network for nature and land conservation (ES), Nordens Ark wildlife part (SE)
TG4: Citizens associations, charities and NGOs, nature-based therapy end-users and civil society in general	Greenpeace, Powys Association of Volunteer Organisations (UK), Metropolitan Gardens Turin (IT), Fundacja Synapsis (PL), Drownica Association of Families and Friends of People with Mental Disorders (PL), MOR (Youth Rehabilitation Center of the Warsaw Charity Society) (PL), Food Sense Wales (UK). Together these organizations reach patients (including underprivileged populations with mental health conditions) and the broader population, which is also a beneficiary of green care.
TG5: Supranational organisations, including EU policy and decision-making bodies	African Inclusive Cities Network, Women in Global Health, EU Bubble members, organisations, including EU Planetary Health Alliance, European Health Alliance, WHO, European Climate and Health Observatory
TG6: Higher education organisations and research centres and institutes	Leibniz Institut für Länderkunde (DE), Central European University (AT, HU), Staffordshire University (UK), Barcelona Institute for Global Health (ES), Metabolic Institute (NLs), Polytechnic University of Valencia (ES), Warsaw University of Technology (PL), UBC (CA), UoW (AU)
TG7: Projects, clusters, and R&I initiatives	GoGreenRoutes, ProGReg, UK Social Prescribing Network, UK Care Farming Network, Catalan Nature and Health Initiative

2. Operational Website

The [project website](#) serves as a business card. It was designed and developed in a way that ensures accessibility (visual impairment users) and an enjoyable user-friendly experience. The landing page clearly states what is at stake: GreenME a Horizon Europe project aimed at fostering mental health for all through nature. Mirroring the developed visual identity, the website presents illustrations and nature-based-solutions oriented pictures. Objectives, partners, and recent news are all accessible via the homepage.

The website will be regularly updated with the most recent outputs and information on the project progress. The website will include the project deliverables, protocols, and open access data. For example, we assess that D2.1, D2.3, D3.5, D4.4 and D5.3 will be of particular interest and attract visitors to the website.

Specific functions will be added to the website in the form of maps and surveys which will showcase project outputs (e.g., maps developed in WP4) and support the project's research activities (e.g., launching surveys in WP4). A forum will be included to elicit debate with visitors.

Google ads will be purchased to increase traffic on the project's website and further increase its impact on various target audiences. where open access reports, deliverables, protocols, and data (including socio-ecological maps and models and guidelines) will be available.

Creation and launch of the website

The creation and development of the GreenME website was deployed according to the following timeline:

- Conversation with the Coordination team (WP1) on the domain name (November 2023)
- Design and development of the landing page (December 2023)
- Development of website main pages (January – February 2024)

Key Performance Indicators (KPIs)

The website (available in all the official languages of the consortium partners) will be designed to act as the primary interface between the project and all actors (TG1-TG7). We estimate that the **website** will have >400 visits per month (total **>19,000 visits during project lifetime**).

Mental health for all through nature

An integrated multi-scalar approach for the expansion of nature-based therapies to improve Mental health Equity

GreenME is a Horizon Europe project that aims to identify ways in which effective nature-based therapy and a broader green care framework can be scaled-up to improve adult mental health and wellbeing equity while contributing to multiple socio-ecological co-benefits.

Green care is a three-scale continuum from **nature-in-everyday-life** (e.g., the existence of green and blue infrastructure for viewing and walks) to **nature-based health promotion** (the promotion of active interaction with nature such as gardening and conservation) to **nature-based therapy** (the provision of treatment for individual patients).

GreenME's guiding pillars

🕒 Learning from existing green care interventions

🕒 Co-designing research and co-creating geographically scalable policy guidelines.

🕒 Integrating mental health and wellbeing impact assessment with a focus on health equity and environmental justice.

Please note that this constitutes a preliminary sitemap. The structure of the website will be constantly updated and revised throughout the duration of the project (as it will heavily depend on partners' contributions, outcomes, results).

3. Social media

Social media accounts for the GreenME project have been set up and launched on the 25/01/2024 – a few days before its official Kick-Off meeting in Barcelona (29-31/01/2024). In coordination with the Project Coordinators and WP1 leader we have informed the GreenME consortium of the launch, inviting and encouraging them to promote via their own social media, as well as via the institutions’ ones the launch of the project’s digital presence.

The goal of this exercise was to start creating, communicating, and engaging with the green care online community. To do so the following accounts have been created ([LinkedIn](#), [Instagram](#), [Facebook](#), [Twitter/X](#)) generating high interest within the community, driving traffic to the website, and boosting public exchanges of opinions over the benefits of nature on mental health.

To date, X has proven to be the best performing platform.

Best performing post: Kick-off meeting

The screenshot shows the LinkedIn profile for GreenME Project. At the top, there is a banner with the text "Mental health for all through nature" and the GreenME logo. Below the banner, the profile name "GreenME Project" is displayed, along with a description: "GreenME is a Horizon Europe project aimed at advancing greencare in Europe to improve mental health equity." It also lists "Mental Health Care - 124 followers - 51-200 employees" and includes buttons for "Follow" and "Visit website".

The "About" section contains the text: "Mental health for all through nature. GreenME is a Horizon Europe project that aims to identify ways in which effective nature-based therapy and a broader green care framework can be scaled-up to improve adult mental health and wellbeing equity while contributing to multiple socio-ecological co-b ... see more".

Under "Page posts", two posts are visible. The first post, from 2 weeks ago, is titled "Last week the GreenME Project partners met in person for a three-day #kickoffmeeting in Barcelona" and features a group photo of the team in front of a tall, cylindrical building. The second post, from 3 weeks ago, is titled "Exciting News: Introducing the GreenME Project - Mental health for all through nature" and features a photo of a person walking on a path through a lush green park.

This block provides a detailed view of the LinkedIn post mentioned in the previous block. The post is from the GreenME Project page, which has 124 followers. The text of the post reads: "Last week the GreenME Project partners met in person for a three-day #kickoffmeeting in Barcelona".

The post continues with: "It was an incredible occasion to get to know each other, the passion that drives us and visualise the unique contributions each partner will bring to the project over the next 4 years."

Next, it states: "WP members, postdocs, researchers and PhDs all worked together to address challenges and way forwards while finding clever solutions to build kapla structures using only one finger".

Then, it says: "In between sessions, we recharged our minds and bodies with walks in nearby parks, mindfulness and mandalas outdoor activities, concretely experiencing how #nature benefits #mentalhealth."

Finally, it gives a "Special mention to the hosting institution Universitat Oberta de Catalunya and coordinating institutions Universitat Autònoma de Barcelona and BCNUEJ ICTA-UAB, to our project officer Patrizia Tenerelli, our sister projects NATURELAB EU Project and Resonate Horizon Europe and to GoGreen Routes, Phenotype EU project BlueHealth EU and Green4C projects for sharing their experience and valuable insights with us."

The post concludes with: "The best is yet to come!".

Below the text is a large group photo of the project partners, with the tall, cylindrical building from the previous image in the background. The photo shows a diverse group of people posing for a group picture outdoors.

Key Performance Indicators (KPIs)

Posts on LinkedIn, Twitter, Facebook, Instagram (target to get >500 new followers per platform per year, with a total of **>6,000 followers in total** grouping all the platforms) including content from the quarterly e-newsletter. Various techniques will be employed to animate the networks such as invitation to post or comment, and polls. We will also post on academic platforms, such as Quora (at least one post quarterly, i.e., >15 posts in total, >30 likes in total, >80 shares and comments in total) and upload research documents on ResearchGate and Academia.edu.

4. Content

To ensure a regular update of the content on the website as well as punctual promotion and dissemination of project's outcomes and key messages, the consortium has set-up and will operate an Editorial Board, of which the main objective will be to assure the consistency of the knowledge management strategy throughout the project's life cycle.

The Editorial Board will gather dedicated WP members and the WP6 Leaders on a regular basis (once a month), and with less frequency the WP5 events team. The W6 leader will chair the board. The WP6 Team will prepare the Editorial Board meetings and will execute decisions taken. It will meet monthly during the first 18 months of the project and twice a month during the last 4 months.

More specifically, this Board will have four main functions:

- Definition of the editorial line of the GreenME project and supervise its implementation.
- Identification of the relevant topics, coming out from the different WPs, on which capitalisation and communication is needed, keeping the right balance between the set of communications tools, the target groups, and the conceptual vs. practitioners' approach.

The editorial line will be developed by the WP6 Leader based on consultation with the consortium partners and proposed for discussion and validation by the Editorial Board.

The aim of the Editorial Board is to provide WP6, who will manage the website and the social media of the project, with content to populate them. The website will be regularly updated (1 time per month), while the social media will be updated (1 per week).
