

GreenME Consortium Meets in Warsaw for 3rd General Assembly

Warsaw, 19 September 2025 - The **GreenME Project consortium** gathered in Warsaw, Poland, from 17 to 19 September 2025 for its **3rd General Assembly Meeting (GAM)**. Hosted by the Warsaw University of Life Sciences (SGGW) and led by Work Package 2 leader **Renata Giedych**, the meeting marked the halfway point of the Horizon Europe project, which is dedicated to advancing green care to improve adults' mental health and wellbeing equity.

Over the course of three days, partners from across Europe came together to share progress, address challenges, and chart the next steps.

Sessions included:

- **Project review and direction:** reflecting on the outcomes of the recent European Commission Review Meeting and aligning on priorities.
- **Research and collaboration:** advancing **joint scientific papers**, sharing progress on audits and surveys, and exchanging ideas across Work Packages to maximize impact.
- **Capacity building and outreach:** developing **online learning resources**, brainstorming **national schemes and guidelines**, and strengthening **communication and dissemination strategies** to reach policymakers, practitioners, and citizens.
- **Equity and inclusion:** a dedicated session on **gender equity** highlighted GreenME's commitment to fairness and inclusivity in research and practice.
- **New voices and perspectives:** **PhD researchers** presented their work, underlining the project's role in nurturing the next generation of sustainability experts.
- **Stakeholder feedback:** the Advisory Group provided valuable insights to guide future actions and ensure GreenME's work remains relevant and impactful.

Beyond the meeting rooms, participants also had the chance to reconnect with nature through a hands-on **study tour, "Nature in the City."** Visits to the Cooperative Urban Farm "Most," the Warsaw Uprising Mound Park, and the Open Jazdów Neighbourhood offered inspiring examples of how urban green spaces can shape healthier, more resilient cities.

"We are happy to have hosted the 3rd GreenME GAM. It was an inspiring get-together that brought everyone around the table to exchange thoughts and energy. The meeting gave the Consortium a great chance to look back on what we've achieved, map out the next steps, and, most of all, share ideas and connect with each other" – stated Renata Giedych.

The Warsaw meeting was not only a moment to take stock of progress but also a celebration of collaboration, innovation, and the shared mission of creating positive change.

About GreenME

GreenME is a Horizon Europe project focused on advancing green care to improve adults' mental health and wellbeing equity. The project brings together 19 partners from across Europe and 1 US partner to bridge science, policy, and society for a greener and more inclusive future.
